

COMPLETE PACKAGING SYSTEMS

Innovation meets experience

The Group

A Privately Owned Company, Cama Group is a Worldwide Leader in the supply of complete, turnkey packaging solutions. With more than 30 years' experience, Cama provides a complete range of packaging machines and robotic systems.

Our Products

Packaging Machines

Forming, Closing and Lidding Machines for boxes, trays and RSC cases

Case Packing Machines for RSC cases, wrap-around style case and display-box

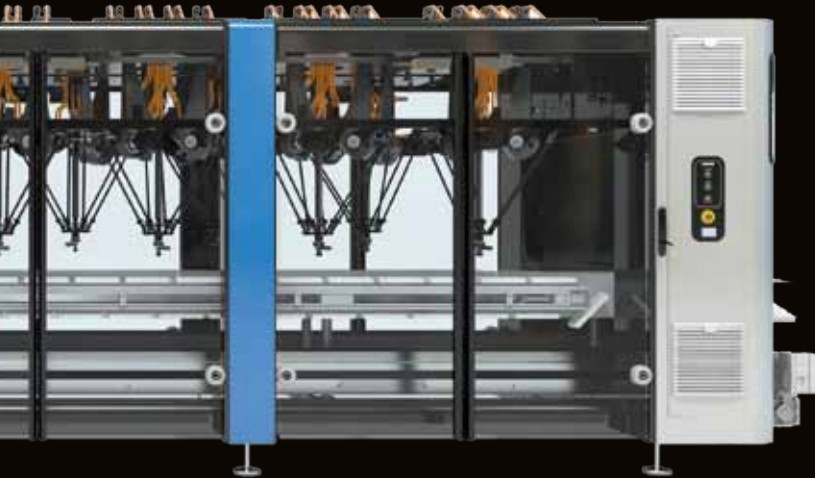

Carton Sleeving Machines for packaging of single or multiple products

Intermittent and continuous motion Horizontal Cartoning Machines

Our Services

Sales Engineering
Packaging Design
Project Management
After Sales Service
Training

Robotics - Top Loading Solutions

Multi Purpose Loading Units

Monoblock Loading Units for loading, forming,
closing and lidding

Vision Guided Robotic Loading Units

Packaging Lines

Forming & Closing Systems

Cama offers a unique range of electronic box and case forming machines, box and case closing machines, as well as lidding systems suitable for any forming and closing project. The combination of high performance and excellent reliability makes these machines extremely suitable for being intergrated into complete production lines for food and non-food applications.

Case Packing Systems

The Cama innovative solutions for RRP (Retail-Ready Packaging) provide a wide range of successful machines developed over the years. The Cama FW and IN electronic case packers are capable of packing a variety of products into RSC cases, one-piece wrap-around or two-piece display cases for retail-ready packaging solutions.

Sleeving Systems

In the secondary packaging market of sleeving machines, Cama's MP cardboard sleeves stand out for their technological innovation and high added value, including accessibility, ergonomic design, performance and functionality.

Thanks to our experience in the carton sleeving sector, with many successful installations in major multinational companies, Cama's sleeving machines provide flexibility, trouble-free running and high productivity.

Side Loading Systems

Since 1981, Cama has been supplying cartoning machines and now offers its CL, horizontal cartoning machine series, with “state of the art” technology. These machines have been developed and improved to offer high-performance and reliable solutions for side loading applications. The Cama cartoning machines can be integrated into complete production lines in both food and non-food markets.

Robotics

Multi Purpose Loading Units

Cama has been providing robotic solutions for over 30 years, now offering its "new generation" robotic loading units with the latest open architecture electronic controls.

Robotics

Monoblock Loading Units for loading, forming, closing and lidding

Cama "IF" Series, a unique combination of integrated packaging machines and robotic loading units, provide added value to our customers by incorporating reduced footprint, flexible size changing and high reliability. These units are designed to handle a wide variety of products, such as flow-wraps, bags, thermoformed packs & cartons and load them into RSC cases, boxes, trays etc.

Robotics

Vision Guided Robotic Loading Units

Thanks to constant investment in our Robotic R&D, Cama has developed a new range of vision guided robotic loading units, following the company's motto "Technology with Added Value". Cama multi Delta vision guided loading units represent another technological step forward to cater to customers needs. These units can load food and non-food products into RSC cases, boxes, trays and other containers.

Robotics

Packaging Lines

All Cama robotic units can be combined in complete packaging lines for biscuits, confectionery, cereals, powders, yoghurt, ready meals, ice creams, personal and home care products, as well as other major industries.
